

I am a subscriber to xm satellite radio, and have it in all my vehicles and at home. I am extremely upset that an organization is trying to stop me from listening to what I want to, when I want to. I benefit greatly from using the features with xm radio. The traffic and weather is instant, and I know I can rely on it, compared to some generic radio station that makes me listen to commercials non-stop.

I pay good money for the services provided by xm radio, and I will not put up with any organization trying to stop a service that they don't even pay for.

I respectfully urge your organization to reject the NAB's petition 04-160, and to support xm radio's ability to provide the programming I demand and deserve.

Sincerely,

Jeff Birchfield
